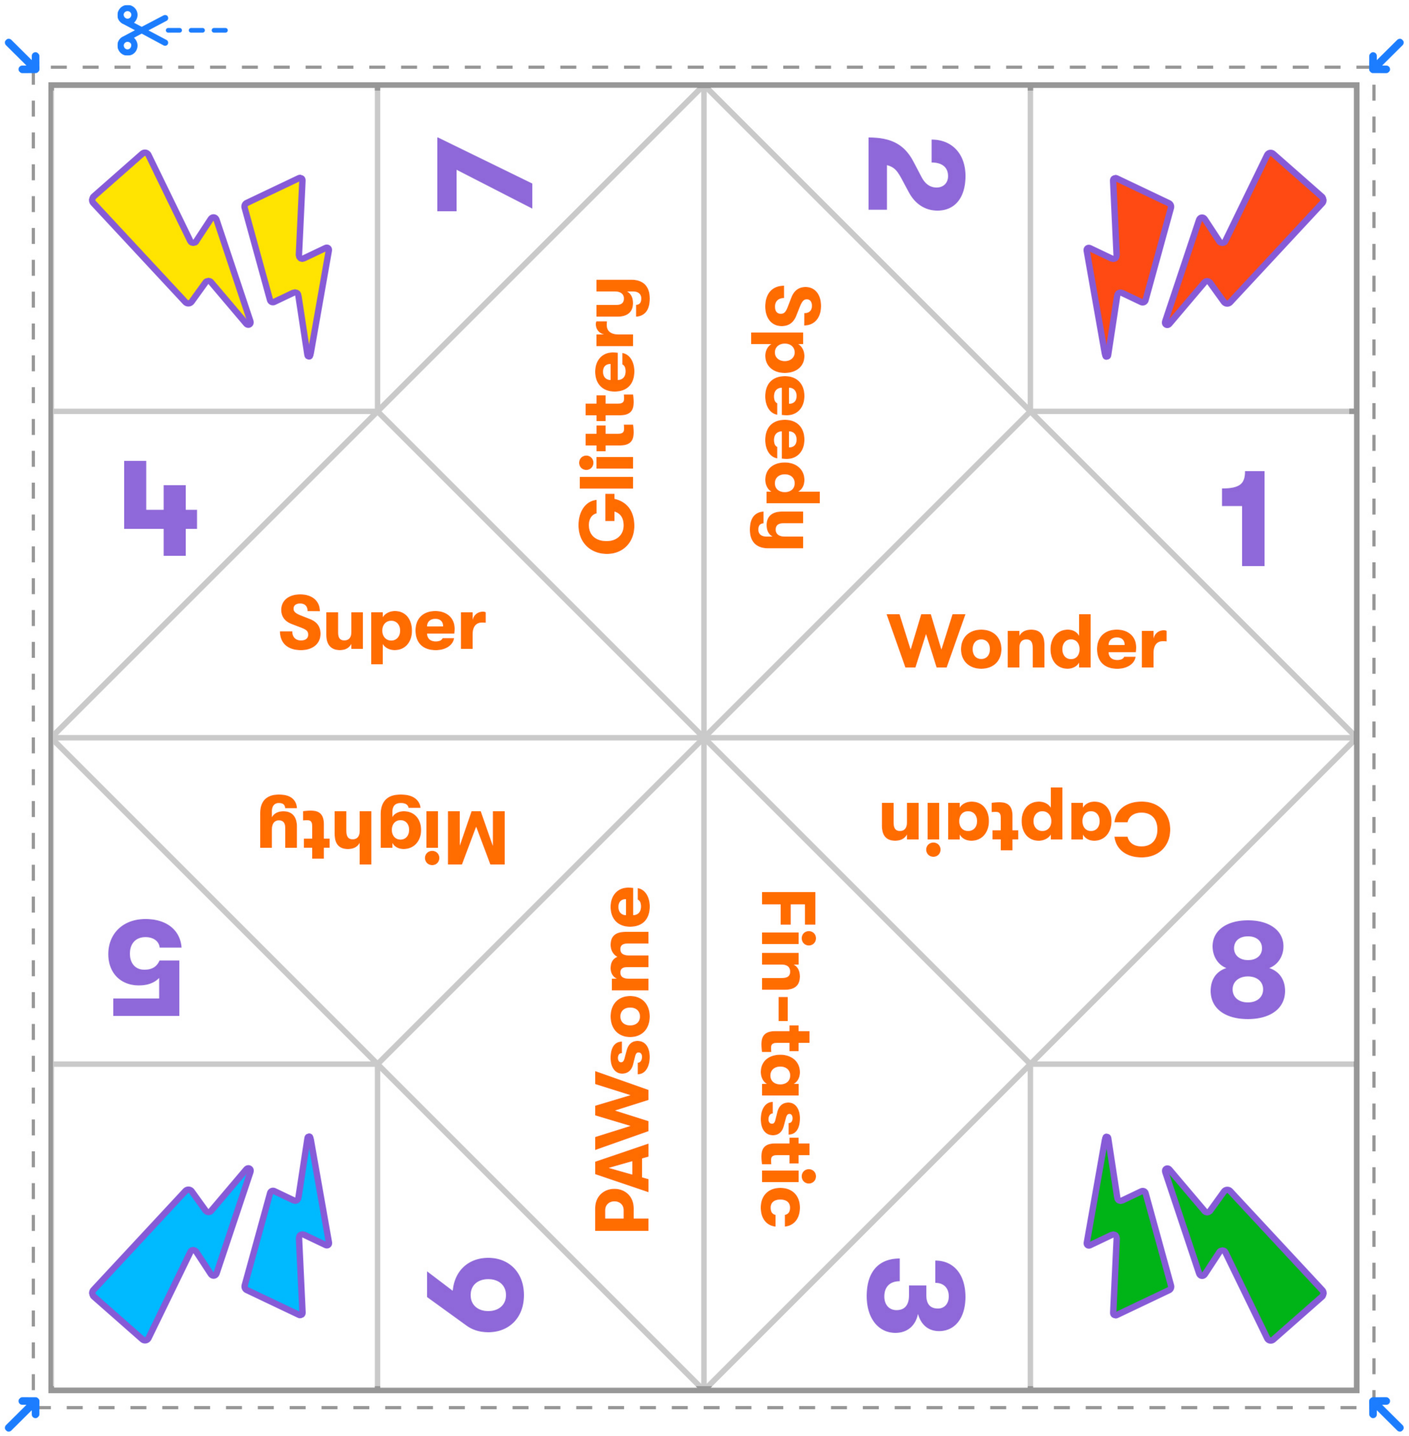
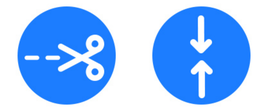
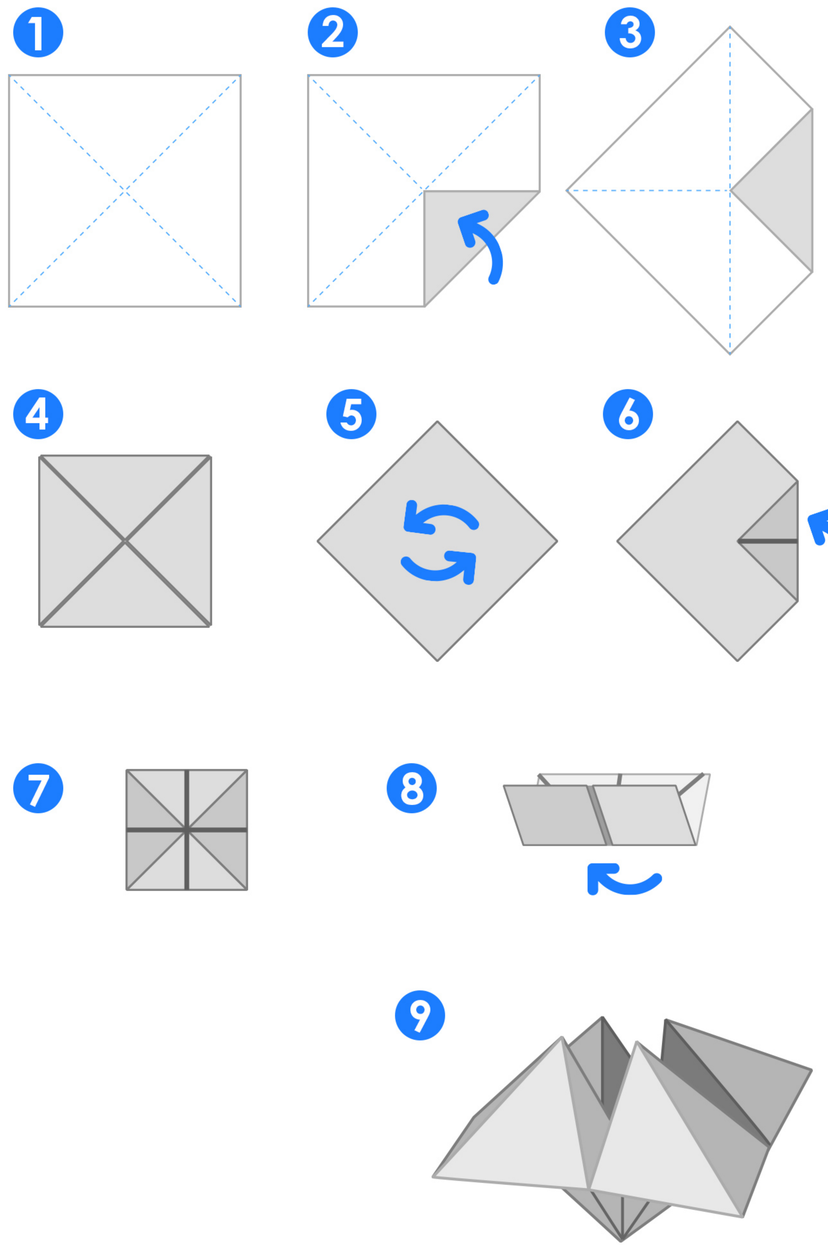
Your Hero Name Game






Parents, cut and fold the printable as shown. Once the name generator is ready, insert both your index fingers and thumbs into the base. Next, have your child select a color and spell out the name of the color as you open and close the hero name generator. Then allow your child to select a number and open and close the hero name generator that many times. Now, have your child pick another number, lift the tab under that number, and announce your child's hero name: the mighty word and then your child's name.
